# LΩGIC Drive 2X

# **FEATURES**

The Logic Drive 2X is designed to feed power and control to remote fixtures using the POE latest standard IEEE 802.3 bt (power over Ethernet) and TCP/IP for control. It has 2 output ports and will support a maximum of 92.5 W/port. The Drive 2X includes one LOGIC Wall Con, which is a single gang wall controller that can recall up to 8 recorded scenes from the Drive 2X. Additional Wall Cons may be added to the system, up to 4 pcs on a single controller to have multiple control locations. The Drive 2X supports DMX, Art-Net, and sACN control protocols, and includes an integrated webserver to configure the date/time settings, which are used in the daily/calendar trigger.
